COMFORT FACTOR™

Powder Approximately 100 scoops

Systemic Enzyme Formula for Dogs and Cats
for Joint Support and Allergy Support

Net Weight 200 grams (7.05 ounces)

Product Facts: (continued)

For use with dogs and cats only

Comfort Factor™ is recommended for joint support while supporting normal flexibility and helps maintain a normal inflammatory response. Can be used for post exercise recovery and occasional muscle soreness. Connective tissue support. Eases joint stiffness due to normal daily exercise and activity. Comfort Factor™ will help break down and digest potential allergens such as tree, grass or weed pollens, flea bite saliva, dander, mold spores, dust, and dust mite feces plus certain food allergens. Supports pets with seasonal allergies.

Directions for use:

Use one level teaspoon (included in jar) which equals two grams, for every 20 pounds of pet's weight once a day. May be given as a powder or in a small bowl, mix a drop or two of room temperature water with each teaspoon of Comfort Factor™, mixing into a paste or a soft ball and give to your pet.

Warnings: Not for human consumption. Keep out of reach of children and animals. In case of accidental overdose, contact a health professional immediately.
